

eto ALERTS

STAY ON TASK AND INFORMED

Working at a nonprofit organization can be hectic. Regardless of your role, it can be difficult to juggle the high volume of daily responsibilities, especially when unpredictable or urgent situations occur regularly. ETO® Alerts is a functionality that allows you to set up reminders and notifications based on criteria specific to your service delivery - to make sure key tasks don't fall through the cracks and staff stay informed.

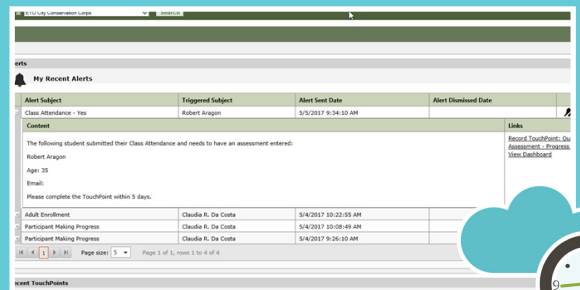

Keep Your Team on Track

Help users stay organized and prioritize their workload. Upcoming and overdue tasks are proactively sent to users via dashboards and/or email to ensure key steps aren't forgotten or missed. Easily customize your alert based on your unique criteria including forms, timing, site, program, recipient.

Save Time

Each alert can be customized to include relevant information about the participant and links to the next task, creating a streamlined process and saving time for end users.

Stay Informed

ETO® Alerts has conditional triggers that allow users to stay up to date on critical information and client progress by automatically sending alerts when key actions are performed such as new form responses, enrollments, referrals, workflows and more!
