# MULTI-FACTOR AUTHENTICATION

### KEEP ACCOUNTS AND DATA SECURE

Working with vulnerable populations across multiple programs and staff makes maintaining a safe and secure system critical. **Multi-Factor Authentication** makes logging in to ETO a two-step process. This adds an extra layer of protection to your accounts and keeps your data in the right hands.

### VERIFICATION YOU CAN COUNT ON

Multi-Factor Authentication requires users to complete multiple steps every time they log in to ETO, providing an extra layer of security and helping you meet all necessary security standards.

### SECURITY IN THE PALM OF YOUR HAND

When users log on to ETO a verification code is generated and sent directly to their mobile device. Only the owner of the mobile device linked to that user account will be able to log on, ensuring that data stays in the right hands.

### CUSTOMIZED TO MEET YOUR SECURITY NEEDS

Authentications can be created so every team member has access to exactly what they need according to your organization's rules and procedures.
